### Recommendations for users of the North Face Bike Park on observing social distancing minimums

There are a number of specific recommendations for advising the public to keep safe social distancing when in parks or on trails.

- Follow CDC's guidance on personal hygiene prior to heading to the parks or trails — wash hands, carry hand sanitizer, do not use parks or trails if you have symptoms, cover your mouth and nose when coughing or sneezing, etc.
- Observe at all times CDC's minimum recommended social distancing of six feet from other people and limit mass gatherings to no more than (10) people. Practice it and know what it looks like. Keep it as you walk, bike or hike or play in a park.
- For Bike Park users, warn other users of your presence and as you pass to allow proper distance and step off trails to allow others to pass, keeping minimum recommended distances at all times. Signal your presence with your voice or bell
- Note that trail and park users may find public restrooms and picnic shade shelters closed — be prepared before you leave and time outings so that you are not dependent on public restrooms.
- Bring water or drinks — public drinking fountains are disabled and should not be used, even if operable.
- We are asking users to follow the CDC, State and County guidelines to protect yourself and others. "Safer at Home" recommendations are to wear masks, socialize less and proceed with extreme caution.

More stringent measures may be employed by the government to restrict the use of public spaces and we may be forced to close these public recreation amenities if social distancing and the 10 person group size limits are not being followed.

This guidance is current today, but could change with new CDC (Center for Disease Control) guidance and local, county, state and federal restrictions.
